FRUITS AND VEGETABLES

PTAE "UMAN GREENHOUSE COMPLEX"

TM "From The Garden Bed"

Red tomatoes, Pink tomatoes, Yellow tomatoes, Truss tomatoes, Smooth skinned cucumbers

Standard pallet: Boxes of 5-6 kg: Weight of box net – 5-6 kg +1% (for natural losses during transportation), Size of boxes dimensions (cm) 30x40x14, Pallet (cm)80x120, Amount of boxes on the pallet 120-112, Net weight of pallet – 600-672kg, Gross weight of pallet ~net + 10% (from net). European type transport packaging.

The company was established in the year 1974. Reorganization of it into the company with private ownership in 2002 triggered fast development and modernization. Production facilities has expanded, the number of products under cover has grown.

Today the area of greenhouses of European type is near 35 ha. Greenhouses are located in Uman, Kristinivka and Talnoye in Cherkassky region.

Today Uman Greenhouse Complex operates the most up-to-date greenhouses of European type, in which the latest innovations and achievements in growing vegetables under cover are used. They include the innovative construction of greenhouses themselves, allowing to increase luminous flux for more than 10% in comparison with greenhouses of previous generations, complex computer-aided system of microclimate support, energy-saving technology of using greenhouse gases, and many other unique and innovative solutions that al-

low to increase considerably both yield capacity and quality of products at the same time, saving energy and labour efforts.

In recent years the plant implemented series of large-scale investment projects with involvement of leading Western companies and specialists.

A new nursery compartment was completed in 2012, where the newest technologies are applied.

The plant has its own agrochemical laboratory of soil, water and fertilizers.

The plant has a warehouse complex with the area of 10,000 m² meeting the highest requirements for storage and processing products. Own logistics center is optimum solution for product sorting, pre-packing, packing and delivering.

The aim of Uman Greenhouse Complex is to increase production of vegetables of a high quality and to expand sale markets.

LLC Agrana Fruit Ukraine

Our company

Agrana Fruit Ukraine company was founded in 1997 and now is a part of the Agrana Group.

The AFUA specializes not only on fruit and berries processing, but also includes a full cycle from growing and storing up of raw materials to processing and production of finished products — fruit fillings for pastry, ice cream and dairy products.

The company also sells frozen berries and vegetables grown and picked up in Ukraine, including wild berries: blueberries, blackberries, chokeberry, black currants, cranberry and others.

Our customers receive all our attention and service according to international standards. Our clients are our business partners. We always strive to meet their requests and needs.

Our technology of fruit and berry fillings producing allows to make products with maximum preservation of fresh fruit and vegetables nutrients. Fruit fillings contain fruit puree or crushed pieces of fruit or berries, sugar, citric acid, sugar, stabilization system and other components.

We use completely closed system of fruit processing. The finished product is immediately packed in aseptic package that gives greater guarantee of

product preservation throughout the shelf life, since it is produced without preservatives. To carry out thorough quality control, a specimen product of every batch is stored till the expiry date. Laboratory examines the changes of fillings (colour, taste, aroma and consistence) during the period of storage. Analysis results help to improve the formulation of fruit fillings, maximally reduce the loss of gustatory and other organoleptic characteristics.

Fillings for dairy products (homogeneous and heterogeneous)

Fillings for pastry (thermostable, not thermostable, jams, fruits in gel for croissants, donuts, breakfast cereals)

Fillings for ice cream (bases and pastes, sauces, rods, toppings)

Frozen berries and fruits
(whole berries, slices, cubes, puree)

Merchant venture Nezhin is a trade division of Nezhin preserves factory, the exclusive distributor of the Nezhin trademark.

Nezhin canning factory situated in Nezhin town (North-East of Ukraine) is well-known producer of canned fruits and vegetables in Ukraine.

The plant was founded in 1927. Original ancient recipes using natural spices are still the basis for production. The unchangeable traditional products form the basis for development of new products, taking into account the preferences of modern consumers.

Only fresh Ukrainian vegetables are preserved and 90 percent of our ingredients are domestically grown.

Nezhin preserves factory offers a full production range, from growing vegetables to packing of finished products.

More than 1,000 hectares of agricultural fields are under cultivation in the Nezhin region of Chernihivska Oblast (Pereyaslovka Village)

The factory uses modern equipment from Hungary, Netherlands and Germany.

The laboratory controls all production processes, starting with the receipt of products and materials and ending with the delivery of finished products.

Nezhin canning factory has won numerous awards for different product exhibitions.

ISO 22000 and HACCP certificates are in hand.

Nezhin canning factory produces a variety of canned vegetables, up to 30 different items. Among them there are pickled cucumbers, vegetable cannery and canned tomatoes.

For its products, Nezhin canning factory uses brand quadratic jars with the letter "N" on the bottom and a "twist-off" lid with a unique design.

ACC LTD

TM Pomidora

The company, which presents "POMIDORA" trade mark has been operating since 2000.

During its existence, the company contributed significantly to the development of the food industry in Ukraine. It shows stability in permanent increase in indices of production and sales volume of wide range of tomato paste and sauces in retail pack.

High-quality raw materials and new technologies enable the company to offer customers high-quality product at a reasonable price.

"POMIDORA" trade mark is not only a wide range of tomato paste and sauces, but it is also a high quality product, reasonable price and unforgettable taste. Nowadays "POMIDORA" trade mark is one of the three leaders of tomato paste and sauces manufacturers in Ukraine.

High quality of such products as tomato paste, puree, sauce, ketchup or mayonnaise is the distinctive feature of the brand. It is able to satisfy wishes

of the majority of consumers!

The products of the trade mark "POMIDORA" cannot be confused with any other products, thanks to the sun and dew, which make tomatoes fresh and ripe.

The unique pasteurization technology of finished products ensures microbial safety of the products and saves natural red color of ripe tomato without the use of dyestuffs and antioxidants.

The process of mild heat treatment of tomato paste, sauces and ketchups keeps a pigment lycopene (natural antioxidant of tomatoes) safe, which makes beneficial effect on the human organism. Technologists improve the taste of traditional sauces of the national cuisine, using vegetables and spices familiar to Ukrainians. Therefore, the taste of TM "POMIDORA" products will be a highlight of a wide variety of your meals.

We made our name on quality!

Agricultural firm "Evrika" TM "S babushkinoi griadki"

Agrofirma "Evrika" is a vertically-integrated enterprise for growing and processing vegetables. The firm cultivates the following agricultural crops: vegetables (tomatoes, cucumbers, green peas, marrows, onions, carrots and others), legumes (beans, chickpeas), and cereals (barley, wheat).

We process our vegetables into canned food under the TM "S babushkinoi griadki" (TM "From granny's garden"). Canned food range includes more than 40 items. In the production of canned food we use:

1. Only natural and fresh ingredients of own production,
2. Ecological packaging — glass jars,
3. Delicious and healthy recipes, tested by time.

We principally do not use chemical additives: stabilizing ingredients, flavorings, preservatives, sweeteners, colors and the products containing GMO. With our products we give customers only the health and happiness throughout the year.

Export products:

- Canned tomatoes and cucumbers
- Tomato paste
- Vegetable juices in assortment
- Beans in assortment
- Green peas
- Vegetable marrow paste
- and lots of other products

CORPORATION “BISCUIT-CHOCOLATE”

TRADITIONS OF QUALITY SINCE 1896

KHARKIV CONFECTIONERY «KHARKIVYANKA»

Confectionery manufacturing in Kharkiv dates back to 1896 when the famous merchant Georg Borman, the Supplier to the Court of His Imperial Majesty built a chocolate factory in the city. Today Confectionery “Kharkiviyanka” not only keeps the traditions of its founder but also actively expands its product range and develops new types of confectionery. Confectionery “Kharkiviyanka” has a full processing cycle of high quality cocoa beans supplied from Ghana and Cote d’Ivoire.

KHARKIV BISCUIT FACTORY

Kharkov Biscuit Factory was founded in 1935. This is a Ukrainian confectionery specialized in pastry manufacturing: sponge cakes, swiss-rolls, sets of butter biscuits, shortcakes, cookies, crackers, chocolate and wafers cakes, desserts, wafers, wafers rolls.

CORPORATION «BISCUIT-CHOCOLATE»

In 2004 for the purpose of strengthening the position of enterprises in the local and foreign markets it was decided to consolidate the Kharkov Biscuit factory and the Confectionery factory “Kharkiviyanka” into the Corporation “Biscuit-Chocolate”. At present the Corporation “Biscuit-Chocolate” keeps the second position in the national rating of confectionery producers in Ukraine and exports its products to 28 countries.

To confirm the high quality of confectionery which the Kharkov Biscuit Factory and the Confectionery factory “Kharkiviyanka” produce the quality management system and safety of foodstuffs are certified to meet requirements of the world standards ISO 9001:2008 and ISO 22000:2005.

In 2013, factories of the Corporation “Biscuit-Chocolate” received certificates of conformity of their products to the canonical requirements of the Shariah according to the «Halal» norms.

Ukrainian food has become an integral part in ensuring global food security. Such integration into the global market became possible due to receiving leadership positions in the world markets of grain and oil. During the last decade Ukraine continues to increase exports of finished food in several different positions. Among them fruits and vegetables, alcoholic and soft drinks, confectionery, meat and dairy products are particularly popular. Ukraine confidently holds primacy in the global market of honey, nuts and flour.

But Ukraine is rich not only in these positions. Unfortunately, not all potential buyers are aware of the agricultural sector possibilities. Ukrainian potential in ensuring global population with quality food is one of the largest in the world. In order to show and tell about the unknown possibilities of food products export the first edition of Ukrainian Food catalogue has been created. It will be one of the first stages of the launching of the international promotional campaign to create a positive image of Ukrainian food.

“Ukrainian food 2015” catalogue is the image project of Ukraine in the world, the first English-language collection of information about Ukrainian exporters of food that will be distributed to potential importers through state and private contact channels.

The purpose of the publication and distribution of the catalogue is to inform potential importers about types of Ukrainian food.

We hope that this catalogue will help you find a reliable contractor among Ukrainian enterprises.
