

[The V International "Congress Organic Ukraine 2021"](#)

Was held online on April 15-17, 2021.

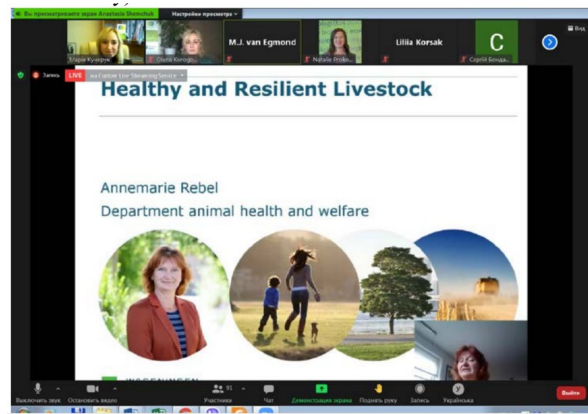

The organic sector gathered for the fifth spring to discuss key issues of the organic market. Organic production is an important area for the development of agriculture in Ukraine and the world, so the discussion was powerful and very relevant. Approximately 900 participants from various countries attended the

event, experts from Ukraine, Germany, Belgium, Poland, the Netherlands, Moldova, Belarus, representatives of international organizations.

5 key topics were discussed at the event:

- Political Dialogue. Industry's interests at the national and international levels
- Market Analysis of the Sector. Research and forecasts
- Real Cases and Potential. Achievements and opportunities
- Green Deal for the Organic Market. Available resources for sustainability and climate responsibility
- Organic Lands. Revival of soil fertility, science for business

As a result of the International Scientific and Practical Conference "Scientific Prerequisites of Optimization Organic Business" within the V International "Congress Organic Ukraine 2021", which took place on April 17, 2021 on the Zoom platform, compendium was created and can be viewed and downloaded. [View](#) a compendium.

Two Dutch speakers delivered their presentations about Dutch view on sustainable farming practices for the participants of the Scientific conference on April 17. They were: **Ryan van Egmond**, from Royal GD, who told about the Dutch experience of antibiotic reduction and **Anne Marie Rebel**, head of Department of Animal health and welfare of Wageningen University, who shared experience of ensuring animal health and resilience in animals in the Netherlands.
