AGRO ORGANIC

LLC

Agro Organic was established in 2016. The company is a vertically integrated production and processing company that grows raspberries, alpine strawberries and sea buckthorn on the area of over 80 hectares and has a freezing facility with the ability to simultaneously store 1,500 tonnes of frozen products. The available optical sorting technologies, certification according to HACCP and ISO quality standards make it possible to ensure class A and class B standards for frozen berries in accordance with the customer's specifications.

AHIMSA

DVIPA LLC

In 2005 we gathered a group of people who like to live in a different way – with no harm, envy, greed, etc. We want to change our life for better and create a community of people who can show that we can be happier working together with nature and cows. And we did it! We got the best 150 hectares of land and soil in Ukraine – a nature reserve in one of the purest places – Chernechchyna village, Dnipropetrovsk region, on the bank of the purest river of Europe – the Orel River. Since that time we have been turning our ideas into reality and creating a small village: work hard, develop land and grow!

Now we have:

- 40 hectares of berry fields (strawberry, raspberry, red currant);
- 100 hectares of amaranth, spelt, wheat, rye, and corn;
- 5 qualified specialists, who are practicing the Ahimsa lifestyle and bring love and care to our plants;
- more than 40 people, who live together, work on fields with love and care, and who are fully happy about that; our Ahimsa™;
- thousands and thousands of grateful customers, who love our products.

AMETHYST-OLE

LLC

The company was created in 2011 by Vasyi Chamor. In 2013, the company was certified organic for the first time and has confirmed its organic status yearly ever since. In 2018, we passed HACCP, ISO 9001:2015 and ISO 22000:2005 audits. Amethyst-Ole has been acknowledged by Naturland since 2013. At this point, two powerful production lines for electronic berry sorting are in use at our facility. With cutting-edge equipment and professional teamwork, the company manufactures up to 30 tonnes of IQF produce a day.

As of today, we have 3 freezing chambers with a total capacity of 40 tonnes and 2 storage chambers where up to 700 tonnes of products can be stored at the same time. Our production capacity allows us to manufacture up to 30 tonnes of frozen produce daily. Food safety and product quality are the two most important factors in growing, collecting and processing our fresh berries, mushrooms and nuts. From the field and forest to harvesting and through production, Amethyst-Ole strives to assure food safety standards and effective tracking of both its organic and conventional products.

BIGBLUE

YAHIDKY, AMC

EST. 2016

Our organic farm was established in 2016 in Kyiv region (Khmilna village). We are an organic blueberry producer, certified according to the EU organic standard, Global G.A.P. and Global GRASP.

At all times, since the establishment of the farm, we have cultivated the land and plants only by using organic technologies permitted for the organic production. Our main goal is to produce high-quality organic products using the world's best practices and high standards of quality and social responsibility, as well as the Global G.A.P food safety protocol.

DARLISAD

LLC

We are a family-owned company that was founded in 2005. We are located in the forest area in the west of Ukraine. For over 15 years we have purchased, processed, frozen and sold high-quality fruits supplied by our farmers from the ecologically cleanest regions of Ukraine.

Our mission is to make customers remember Darlisad when they think about berries. We seek to deliver high-quality products and to be a preferred supplier.

Our company follows the highest quality standards on this demanding market. In order to guarantee the highest quality, we have implemented food safety management systems at our plants complying with HACCP principles and FSSC 22000 and ISO 9001 standards, as well as organic production. Taste the difference! We are open to the new projects!

DIBRIVKA AGROSERVICE

LLC

The company was founded in 2003. Since 2013, we have been cultivating remontant raspberry of Polana and Polissia varieties on the area of 34.8 ha in Dibrivka village, Kyiv region. In 2018, the shock freezing chamber and storage chambers were constructed which allow us to freeze, pack and store our products. Every year we produce 170-200 tonnes of organic raspberries.

The production complex consists of raspberry plantations, pre-cooling, shock-freezing, and packing chambers, as well as 3 storage chambers with the capacity of 200 tonnes of ready products. Our production and processing facilities are certified organic.

Since 2019, we have been successfully selling frozen organic raspberry on the domestic market and exporting to Poland and Belgium.

The company policy is based on the principles of fair trade and long-term partnerships with suppliers and customers.

ECO BERRY

LLC

The company was established in 2017. Our company specializes in growing such berries as organic garden strawberry, remontant raspberry, summer raspberry, black currant, red currant, blackberry, honeysuckle, blueberry. The farm is also engaged in wild collection of bilberry, blackberry, cranberry, lingonberry, elderberry, and wild mushrooms in the Carpathian Mountains. Our farm is certified organic, so we can grow organic berries following the requirements of the EU organic and FSSC 22000 standards. All our products go through such processes as optical sorting, metal detection, and freezing of two types (static freezing, IQF in the OctoFrost tunnel). Packaging of finished products is possible at the customer's request or as offered by our specialists, for example, in cardboard bags of 25 kg or cardboard boxes of 10 kg. The company already exports to the EU countries, namely, Poland, Italy, Bulgaria, Spain, Germany, Romania, as well as Belarus.

FAMBERRY

LLC

Famberry™ is a unique brand, modern family business, highest quality and authenticity of traditions. Our main product is cornel, grown according to the EU organic standards. We are the FIRST national producer of useful and high-quality cornelian products!

The company is constantly developing in all areas of its activities in organic farming, fine-tuning the organic berry processing technology, as well as marketing and commercial activities.

To support the modern farming methods and the fastest possible implementation of agrotechnical organic achievements of leading experts in this field, from the very beginning the company representatives have been attending the most important events for the development of organic fruit and berry farming in Ukraine and abroad. Since 2017, the company is a member of the Organic Ukraine Association, and since 2013 - a member of Zaporizhzhia Chamber of Commerce and Industry of Ukraine.

We have attended a lot of national and international exhibitions, such as RIGA FOOD 2017 (Riga, Latvia), Interfood & Drink 2017 (Sofia, Bulgaria), Polagra 2018 (Poznan, Poland), FOODEX Japan (Tokyo, Japan), Sial (Paris, France), Gulfood (Dubai, UAE) and Anuga (Cologne, Germany).

FAMILY GARDEN

LLC

FAMILY GARDEN LLC was established in 2016 by Ivan P. Grechivsky and Volodymyr I. Pak, members of the same family. FAMILY GARDEN produces organic fruits and berries. The lands used to grow organic crops are located in Katyuzhanka village, Kyiv region.

At the very date of establishment of FAMILY GARDEN the founders realized that organic production of berries is what they were looking for. For that reason from the beginning they started to buy saplings, fertilizers and other special means to grow berries. In the past years the company exported berries to the EU, Malaysia, UAE. This year the company has the plans to expand its export market.

LLC

Herbatica LLC is one of the leading Ukrainian suppliers of medicinal herbs, flowers, leaves, roots and berries.

The company was established in 2017.

We occupy a significant share of the domestic market and have strong and successful business relations with prominent European traders and processing companies.

Using our strong background in the medicinal herbs sphere and an extensive worldwide network of collectors we can quickly propose a large list of different botanical herbs (from our basic portfolio or by request). We already export our products to France, Italy, Spain, Germany and other European countries.

LIKE A BEE

COOPERATIVE

The cooperative was founded in 2018. The cooperative has 111 hectares of land planted with perennial crops (raspberries, blackberries, garden and alpine strawberries, dog rose, elderberry, wrinkled rose). The cooperative also owns 1,117 sq m of drying facilities.

In the previous years our products were sold through traders. With the increase in amount of our own products, we plan to export to the EU countries on our own.

ORIL-ECO

COOPERATIVE

Driven by love for our native land, we create a high-quality, healthy and environmentally friendly product for our partners, who will bring it to those who value youth, health and beauty.

Oril-Eco company was founded in 2018. The company grows strawberries on the area of 12.8 hectares and remontant raspberries on an area of 22.7 hectares in Tsarichansky district of Dnipropetrovsk region, Ukraine. We have completely organic fields and organic crops.

We strictly adhere to food safety requirements and standards as well as to organic production technologies, which are developed for us by one of the best organic agronomists in Ukraine.

In 2019 the company launched its own freezing complex, which now allows processing the entire crop of strawberries and raspberries. It consists of a pre-cooling chamber, static shock freezing chamber at a temperature of -36 ° C for 15 tonnes of berries, packing chamber with metal detector control of finished products, two storage chambers with the capacity of 80 tonnes of finished products.

The refrigeration complex includes two strawberry washing lines.

Every year the company harvests and freezes 130-170 tonnes of organic strawberries and 100-130 tonnes of organic raspberries. Our production is certified according to the FSSC standard which is confirmed by corresponding certificate.

In addition, Oril-Eco has been successfully exporting frozen berries to the EU countries (Netherlands and Poland) since 2019.

PODILLYAAGROBUSINESS

LLC

Podillyaagrobuissness was established in 2015 and is engaged in cultivation of organic berries, such as raspberry, strawberry, black currant and cherry.

The company is also engaged in processing and freezing of berries and their export to the EU countries, such as Germany, France, the Czech Republic, Poland, Switzerland, and Hungary.

The company manages the agricultural production of berries on the area of 72 hectares, 45 hectares - for strawberry and raspberry and 27 hectares - for currant. The company has also a number of independent suppliers of raw materials, with whom it has cooperated for a long time and supported the technological process of growing berries. To meet high requirements of customers Podillyaagrobuissness attracts certified contractors with high reputation and modern equipment for the production of frozen products of class A and B in various types of packaging, including retail and private label. The experience of working with numerous customers from the EU countries makes it possible to quickly meet the specific needs of importers.

PRIMED

LLC

PRIMED LTD was founded in 1995. Our company is one of the largest producers and exporters of frozen berries and walnut kernels in Ukraine. In 2014, the company was certified organic, and in 2017 it was included in the list of the 3 largest companies producing organic products in Ukraine. Our own production facilities are located in the west of Ukraine, which makes it possible to produce only ecologically clean and 100% natural products. All the products are made from carefully selected raw materials, processed and packaged in accordance with international quality standards. One of the factors for company success is long-term and trustworthy relationships with committed business partners. The company pays special attention to improving communication, evaluation of customers' needs and their satisfaction with the highest quality and insists on continuous improvement. With commitment and experience in the industry, our mission is to provide premium healthy foods for our customers worldwide. We look forward to developing strong partnerships with customers who demand quality products.

SAD-LOGISTIK

LLC

Sad-Logistik LLC was founded in 2014. It is a certified producer of organic fruit and berries. The land for the production of organic berries is located in Vinnytsia region. Since the founding of Sad-Logistik LLC, the founders came to the conclusion that they want to engage in organic berry production, so from the very beginning there has been control over the purchase of seedlings, fertilizers and other special tools for planting. The company has exported berries to the EU countries in recent years. This year it plans to expand exports to other countries.

SAV AGRO PARTNER

LLC

SAV AGRO PARTNER was founded in 2017. It specializes in cultivation and further freezing and sale of organic berries, namely, strawberry and raspberry.

Our berries are grown on the fertile land of Volyn region, the total land bank is more than 150 hectares. Thanks to the close cooperation with Organic Standard, our company is certified as an organic producer, which means that the constant control at all stages of growing and processing of berries provides a guarantee of safety and environmental friendliness of our products. The company owns refrigeration facilities which allow quick processing of fresh produce and pre-sale preparation. All the products are stored under a controlled temperature regime in the refrigerated rooms, which ensures accuracy and long-term storage.

The priority of the enterprise is quality of cultivated products, which meet high requirements of our customers, which is achieved through the European standards of work and introduction of advanced agricultural practices.

The company already exports to Poland and Belgium.

SHANS VIK

LLC

Shans Vik LLC is a Ukrainian certified organic collector and processor of dried berries and herbs since 2018.

The drying facilities are located in Volyn region, in the ecologically clean area in the middle of forests far from big cities. We have two natural air drying facilities with heat exchangers. All the raw materials are mainly wild collected and come for processing fresh on the day they are collected. 90% of our dried berries and herbs are exported to the EU for tea and pharmaceutical industries and comply with the European standards. The company policy is based on the principles on fair trade and long term relations with suppliers and customers.

YAROFRUIT

LLC

YAROFRUIT company is a leader in collecting, processing and supplying high-quality frozen fruit and berries for all kinds of industries. All wild berries are collected in clean regions of Ukraine. It allows to control and receive eco-friendly and safe raw materials – wild berries from the stage of preparation and collection of berries in the forest. The company was established in 2016. Our activities focus on leadership in the segment of frozen fruit and berries, emphasizing the quality of incoming raw materials and processing technologies using the modern European equipment. Collection of raw materials is carried out in Ukraine in ecologically-clean Volyn, Lviv and Carpathian regions.

Our production facilities are located in the Carpathians and Lviv region. Today, there are 2 freezing places and 8 warehouses where 3,000 tonnes of frozen food can be stored at the same time. Recently we have invested UAH 7 mln in the modern sorting and packaging equipment. Our production capacity allows us to produce more than 120 tonnes of frozen wild blueberry on a daily basis.

ZEMLIA ORGANIC

LLC

Our organic farm was established in 2016 to become a center of honest, genuine, and healthy food for people and land. Zemlia Organic operates on 200 ha of its own certified organic land. All the food grown on the farm is organic and certified according to the organic standards of the European Union.

In 2019, Zemlia Organic launched a modern food shock freezing and packing factory for the berries and mushrooms with the capacity of up to 300 tonnes.

We started developing and improving our organic methods on a smaller scale with Joan Jay and Himbo Top raspberry varieties. In 2017-2021, our products in the amount of 140 tonnes were exported to the EU.

In 2019, we planted 3 ha of Honey strawberry and 1 ha of Victoria rhubarb, and gathered the first 26 tonnes of strawberry and 2 tonnes of rhubarb in 2020. In 2021, we also sold 20 tonnes of strawberry and raspberry each. We are consistently expanding our organic lands and today we have reached more than 200 ha.

Our farm and freezing facilities are located 75 km from the border with Poland, which facilitates the logistics and export. We are open to cooperation!

AHIMSA

DVIPA LLC

In 2005 we gathered a group of people who like to live in a different way – with no harm, envy, greed, etc. We want to change our life for better and create a community of people who can show that we can be happier working together with nature and cows. And we did it! We got the best 150 hectares of land and soil in Ukraine – a nature reserve in one of the purest places – Chernechchyna village, Dnipropetrovsk region, on the bank of the purest river of Europe – the Orel River. Since that time we have been turning our ideas into reality and creating a small village: work hard, develop land and grow!

Now we have:

- 40 hectares of berry fields (strawberry, raspberry, red currant);
- 100 hectares of amaranth, spelt, wheat, rye, and corn;
- 5 qualified specialists, who are practicing the Ahimsa lifestyle and bring love and care to our plants;
- more than 40 people, who live together, work on fields with love and care, and who are fully happy about that; our Ahimsa™;
- thousands and thousands of grateful customers, who love our products.

AGROFIRMA POLE

LLC

EST. 1999

Agrofirma Pole LLC was established in 2007. Since 2009, the company has produced both traditional and organic millet, pasta, assorted flour. The company supplies more than 12,000 tonnes a year of organic and 8,000 tonnes a year of traditional products. Agrofirma Pole LLC cooperates with 15 agricultural enterprises of Ukraine with a total organic area of 10,000 hectares. All of them are located in ecologically clean regions of Ukraine.

In 2011, 80% of the company's products were exported to the EU market and Agrofirma Pole LLC became the leader of the Ukrainian market for the production of organic hulled millet. In 2012, Agrofirma Pole LLC had three agricultural enterprises certified for organic production, and this step made it possible to place orders for raw materials in these farms in advance for next year. In 2012-2013 season, the company's production of organic products reached 50% of total production and amounted to more than 1,000 tonnes. In 2015, an elevator complex with 8 silos was put into operation. In 2016, installation works and commissioning of 8 silos were continued. In December 2018, the equipment for vacuum and gas packaging of products in large volumes (bags) was purchased. Almost 99% of organic products are sold to the EU.

LLC

AGROVEST GROUP LLC was founded in 2011. The main activity is certified organic crop and livestock production. The company specializes in production of organic cereals and legumes. The main crops grown are wheat, barley, buckwheat, soybeans, and corn. Today, the farm grows crops on the area of 3,892 hectares, which are certified according to the EU organic requirements. The company is export-oriented. Some of the organic crops are exported to the EU market, i.e. Poland, Germany, Switzerland, and the rest remain as feed for the cattle. The company is a breeder of Simmental cattle. The number of cattle amounts to 1,760 heads, including 755 dairy cows. All the Simmental cattle and dairy cattle have been imported from Europe. To achieve high results, the latest technologies for keeping Simmental cattle in organic livestock production have been introduced.

ARNIKA ORGANIC (ARNIKA GROUP)

LLC

Arnika Agroindustrial Group is the largest producer and exporter of its own-grown organic commodities in Ukraine. Also, it is the second-largest organic company in Europe.

We produce organic corn, soybeans, sunflower (high oleic), millet, chickpeas, beans, flax and hemp. In addition, we implement R&D in breeding and ensure our own storing, handling and processing.

Arnika guarantees full transparency and traceability of the production chain as we use 24/7 GPS-monitoring and unmanned technologies during field operations.

Our goods are certified in accordance with international, national and private organic standards.

Besides, we have a powerful logistician department and can deliver our goods by trucks, rail wagons, sea containers and vessels. Therefore we successfully export to customers from Europe, Asia, the Middle East and North America and are well known internationally.

LLC

Cepheus-eko is an organic producer which is a part of All in Foody Group, one of the largest organic producers in Ukraine. All in Foody Group was founded in 2013 and started its work on the fields which had not been cultivated for over 20 years. Today the company manages about 10,000 ha of land and exports 90% of its products to Germany, Switzerland, the Netherlands, Poland and Austria. The company produces only those crops which are ideal for the climatic conditions of the north of Ukraine, where the company's lands are located (Zhytomyr region). These are wheat, spelt, buckwheat, Styrian pumpkin, soybeans, sunflower, wheat etc. Combined with modern approaches to organic farming, it allows getting products of the highest quality. The company is certified according to the Equivalent European Union Organic Production & Processing Standard and Bio Suisse.

CHEMEX LTD

LLC

CHEMEX LTD has a history of more than 20 years in business. In 2020, the company launched its new organic processing plant in Kyiv region. CHEMEX LTD supplies premium quality organic ingredients and ancient grains under the brand name ProOrganica for the EU/UK food and feed industry. The company works with certified organic small to medium size Ukrainian farms, ensuring full traceability and transparency throughout the entire supply chain. The processing plant dehulls, sorts, cleans and packs organic products in line with the EU organic and food safety requirements together with specified customer requirements. Storage facilities allow raw materials and cleaned grains to be stored separately in dry and well-ventilated space with a total area of 2,235 sq m. All products are certified in accordance with the EU organic and BioSuisse standards. The Food Safety Management System has been successfully implemented and certified according to ISO 22000:2018. The company cooperates with independent accredited laboratories in Ukraine, the EU and UK to confirm quality, safety and organic status of all the raw materials and products. Each year CHEMEX LTD exhibits under the brand name ProOrganica at the international fairs for organic products like Biofach (Germany), Natural&Organic Products Europe (UK), Middle East Organic&Natural Expo (UAE) and Sana (Italy).

LTD

We, as Gold Exim, provide our clients with agricultural commodities.

Among the main products of our company are pulses and oil seeds. The pulse crops include beans, lentils, chickpeas, peas, vetch etc. And our oil seeds range mainly consists of mustard and flax seeds.

Our processing plant for cleaning and packing has a very high level of quality control thanks to the modern equipment, which allows us to offer a vast range of various agricultural products that are not mentioned above.

Since 2014, we have built successful relationships with customers from a large number of European and Middle Eastern countries and proved ourselves as a consistent and reliable supplier of raw materials for food industry.

MAKYSHYNSKYI SAD

FE

Makyshynskiy Sad Farm was established in 2007, and since 2012 it has been producing organic products. It grows such organic crops as spelt, lupines, oats and mustard. The farm leases land with an area of 1,600 hectares, which is only used to cultivate organic products. Each year, an average of 2,000 tonnes of legumes are exported to Germany, Poland, the Czech Republic, and the Netherlands. In the future, the farm plans to use new high-yielding varieties of crops, updated machinery and equipment. In addition, the farm plans to process crops into final products for human consumption, which requires special equipment and facilities.

FE

The company was founded in 2011 with the aim to distribute organic food in Ukraine.

We can export both organic and conventional products, mostly wheat, rye, oats, barley, millet, amaranth seeds, flax seeds, rye flour, wheat flour, amaranth flour, etc.

As a trader, we can source all the products from the local market, deliver them, and check the quality and load in containers provided the quality is in conformity with the buyer's requirements. We ship in containers in bulk or big bags on CFR basis.

At the beginning of 2014, Organic Country TM was created and from that moment we have been distributing organic products certified by Organic Standard.

SKVYRSKYI GRAIN PROCESSING FACTORY

LTD

Skvyrskyi Grain Processing Factory Ltd was established in 1986-1991 on the basis of the grain reception centre operating since 1931. Having passed a long path from a grain storage facility to a large-scale factory, today it is a modern, powerful and versatile enterprise, one of the leaders of cereal industry in Ukraine and one of the biggest plants in Eastern Europe.

The factory produces different types and grades of groats, flakes and flours from buckwheat, oats, corn, wheat/spelt, rye, barley, and millet. The products are represented in organic, conventional, gluten-free, and baby food quality.

The packing options include bulk, retail (TM Skvyriaka and TM Skvyra) and private-label packaging. Skvyrskyi Grain Processing Factory Ltd is a regular supplier for such worldwide brands as Danone, Nestle, Cerealto, Hero, Kellogg's.

Nowadays, the factory processes more than 5,000 tonnes of grain per month and more than 50% of the production volume is exported to the EU, Middle East, Asia, Africa, CIS, North and South America markets (80+ countries around the world).

The factory is certified according to FSSC 22000, Halal, EU organic (UA-BIO-108), Bio Suisse, and Sedex standards.

STARYI PORYTSK

Старий Порицьк
Porytsk organic

LLC

Staryi Porytsk LLC is a unique Ukrainian enterprise, founded in 2010, producing organic crops and dairy products.

In crop production the work is carried out in 3 directions: grain production, fodder production, production of pulse crops and fodder grasses.

Currently, the enterprise has 750 heads of cattle, including 300 heads of dairy cattle.

The average milk yield for 1 lactation cow is 5,500 kg of milk of "Extra" grade per year with a fat content of 3.8% per cow. The strategy of the enterprise is to ensure a full cycle of production and sales of the products "from field to shelf". The use of traditional recipes and control at every stage of production ensures the highest quality and excellent taste of our products.

PAE IM. T.G. SHEVCHENKA

Our company was founded in 1960s.

We are a modern, innovative company that combines an integrated approach to production activities, so we introduce a closed production cycle: from organic fertilizers for our own purposes to the processing of organic raw materials. We produce a variety of crop and livestock products, take part in international projects and scientific research.

Also, we are a socially responsible company whose main goal is production of quality food and development of the internal organic market, development of the countryside and preservation of the environment. Now the company produces such organic products as soybeans, millet, buckwheat, spelt and other crops, organic fruit (apple) and vegetables (cucumber, tomato, root crops and others) and products of their processing - organic juice and puree.

We also pay great attention to the development of premium beef cattle breeding. The total number of cattle is 730 heads of Hereford and Aberdeen Angus breeds, as well as sheep (Merinolanshaft) - 695 heads, and goats (Boer breed) - 177 heads.

In addition, for our own needs, we produce organic fertilizers - vermicompost using earthworms and compost.

Since 2018, the Company has been exporting its products to Germany and Poland. Also, most of the products are sold on the domestic market of Ukraine.

ZHYVA NYVA

LLC

Our company Zhyva Nyva is one of the top ten producers of organic products in Ukraine, founded in 2009. We have been working for about 9 years and are constantly increasing the area under crops. We plan that in 2022 we will already have about 3,500 hectares of land. The crop rotation includes soybeans, sunflower, corn, millet, buckwheat, beans, spelt, and peas.

All the lands cultivated by Zhyva Nyva LLC are certified according to the international organic standards, i.e EU organic, BioSwiss and COR. The products are grown far away from industrial centers using the technologies that have a positive impact on the environment. The enterprise has a full cycle of grain production, including cultivation, cleaning, drying and storage, which allows us to provide the buyer with the best quality products. We use a long-term crop rotation and thoughtful innovative technologies that allow us to get high yields of the required quality.

DRINKS

FARM GADZ

ALLC

The orchard of Farm Gadz with an area of 600 hectares, planted in 2011 is located in a special microclimatic zone, which allows getting high quality fruits with excellent taste characteristics.

In 2021, 70 hectares of new orchard were planted, in compliance with modern Italian technologies, and more increase in the area, together with a nursery, is planned. It is planned to produce 1 million seedlings annually. The main varieties of apples are: Gala, Red Chief, Golden Delicious, Red John Prince, Idared, Fuji, Champion, as well as other intensive varieties; as well as Conference for pear, and Stanley for plum, which allows us to satisfy the most demanding customers.

In 2013, the farm put into operation a fruit storage, and in 2015 built a modern refrigeration and sorting complex with a total area of 5250 m², which houses a sorting line Sorter, which allows us to sort the apples by caliber, color and weight.

And in December 2016, a refrigeration complex with a regulated gas environment (CGS) with a capacity of 6,500 tonnes of storage was opened.

In 2020, the fourth phase of construction of a fruit storage facility with a regulated aerated medium with a capacity of 4,500 tonnes took place.

In 2021 the fruit processing plant was put into operation, with a capacity of 6 tonnes per hour. In July 2021, the Farm Gadz launched a line of aseptic bottling puree, and from August - a line of juices of direct extraction.

In 2017, the Ukrushka drying line was put into operation at the Gadz Farm. The use of red emitters and convection system allows us to dry different types of fruit with high productivity.

We are constantly increasing the geography of exports, today it is more than 20 countries in Europe, the Middle East and Asia.

We sincerely believe that we "MAKE THE WORLD TASTIER!"

FARM GADZ

ALLC

The orchard of Farm Gadz with an area of 600 hectares, planted in 2011 is located in a special microclimatic zone, which allows getting high quality fruits with excellent taste characteristics.

In 2021, 70 hectares of new orchard were planted, in compliance with modern Italian technologies, and more increase in the area, together with a nursery, is planned. It is planned to produce 1 million seedlings annually. The main varieties of apples are: Gala, Red Chief, Golden Delicious, Red John Prince, Idared, Fuji, Champion, as well as other intensive varieties; as well as Conference for pear, and Stanley for plum, which allows us to satisfy the most demanding customers.

In 2013, the farm put into operation a fruit storage, and in 2015 built a modern refrigeration and sorting complex with a total area of 5250 m², which houses a sorting line Sorter, which allows us to sort the apple by caliber, color and weight.

And in December 2016, a refrigeration complex with a regulated gas environment (CCS)

with a capacity of 6,500 tonnes of storage was opened.

In 2020, the fourth phase of construction of a fruit storage facility with a regulated aerated medium with a capacity of 4,500 tonnes took place.

In 2021 the fruit processing plant was put into operation, with a capacity of 6 tonnes per hour. In July 2021, the Farm Gadz launched a line of aseptic bottling puree, and from August - a line of juices of direct extraction.

In 2017, the Ukrushka drying line was put into operation at the Gadz Farm. The use of red emitters and convection system allows us to dry different types of fruit with high productivity.

We are constantly increasing the geography of exports, today it is more than 20 countries in Europe, the Middle East and Asia.

We sincerely believe that we "MAKE THE WORLD TASTIER!"

PRIMED

LLC

PRIMED LTD was founded in 1995. Our company is one of the largest producers and exporters of frozen berries and walnut kernels in Ukraine. In 2014, the company was certified organic, and in 2017 it was included in the list of the 3 largest companies producing organic products in Ukraine. Our own production facilities are located in the west of Ukraine, which makes it possible to produce only ecologically clean and 100% natural products. All the products are made from carefully selected raw materials, processed and packaged in accordance with international quality standards. One of the factors for company success is long-term and trustworthy relationships with committed business partners. The company pays special attention to improving communication, evaluation of customers' needs and their satisfaction with the highest quality and insists on continuous improvement. With commitment and experience in the industry, our mission is to provide premium healthy foods for our customers worldwide. We look forward to developing strong partnerships with customers who demand quality products.

HONEY

HEALTH TECHNOLOGIES PE

LLC

The company produces superfood Honey Amaranth Blend, a unique organic superfood based on organic honey, amaranth seed germ and other useful ingredients. Our product doesn't contain any sugar, GMO, gluten, dyes or preservatives. Since 2016, we have been introducing systemic developments to create a healthy and, at the same time, delicious product of the highest quality. This product is produced only by us using a patented technology.

The sophisticated technology, which consists of 21 cycles and 14 days of production, provides the basis for product quality that we can guarantee.

Today we have created 6 types of Honey Amaranth Blend. Moreover, we have a lot of ideas for new products.

ORGANIC EXPORT

LLC

Organic Export is a leading Ukrainian honey processing plant, established in 2013, which aims to become a reliable partner for Ukrainian beekeepers and a preferred supplier of natural high-quality honey to customers worldwide. By 2022, Organic Export has achieved a leading position with a strong brand portfolio at the domestic market and plays a key role in export sales of Ukrainian honey. New and modern packaging facilities, a first-class quality laboratory equipped with state-of-the-art instruments, and highly motivated professionals make us one of the undisputed leaders on the honey market.

The company produces and sells a wide range of packed honey in glass jars or plastic buckets of different sizes and forms, labeled or white label, as well as trades bulk honey for international packers. The company offers all varieties of flavors of a true Ukrainian origin, i.e. acacia, linden, buckwheat, sunflower, rapeseed and polyflora honey. The company is certified according to FSSC 22000 and EU organic standards.

The company's main competitive advantages:

100% TRACEABILITY - own field employees supply best raw honey ensuring full traceability "from field to the drum" for each batch.

QUALITY CONTROL - uncompromised quality control at all stages of production at collection, processing and before shipment which is performed by own high-class laboratory.

GENTLE PRODUCTION - new modern production facilities with a unique processing technology that provides the shortest processing time and preserves all the nutritional properties of honey.

UKRAINIAN BEE

LLC

Ukrainian Bee is a modern factory, created thanks to the introduction of the latest technologies and international standards of honey processing quality at all stages of production.

In 2014, when we already had significant experience in beekeeping and honey processing, and the demand for Ukrainian honey on the international markets increased, we created a new company under the UKRAINIAN BEE brand. Our modern, dynamically growing company quickly achieved a key market position in production and export. The introduction of UKRAINIAN BEE's own products on the European market took place in 2015 and was highly praised by foreign partners. In 2016, UKRAINIAN BEE was fully launched. The sufficient production capacity and modern technological equipment of the company can satisfy the needs of both Ukrainian and foreign consumers for high quality product. Our company guarantees perfect honey thanks to its own test laboratory with the most modern control devices. The company's laboratory is one of the few in Ukraine that was established in compliance with the Ukrainian and European requirements.

The area of our production complex is 6,000 square meters. The company's production capacity is 120 tonnes of honey per day. It is possible to store more than 1,000 tonnes of homogenised products ready for shipment at the same time.

The company exports to the EU, Japan and Saudi Arabia

ARNIKA ORGANIC (ARNIKA GROUP)

LLC

Arnika Agroindustrial Group is the largest producer and exporter of its own-grown organic commodities in Ukraine. Also, it is the second-largest organic company in Europe.

We produce organic corn, soybeans, sunflower (high oleic), millet, chickpeas, beans, flax and hemp. In addition, we implement R&D in breeding and ensure our own storing, handling and processing.

Arnika guarantees full transparency and traceability of the production chain as we use 24/7 GPS-monitoring and unmanned technologies during field operations.

Our goods are certified in accordance with international, national and private organic standards.

Besides, we have a powerful logistician department and can deliver our goods by trucks, rail wagons, sea containers and vessels. Therefore we successfully export to customers from Europe, Asia, the Middle East and North America and are well known internationally.

LLC-ENTERPRISE “AVIS”

LLC

LLC-enterprise “AVIS” was founded in 1991 in Vinnytsia (Ukraine). The picturesque endless fields, pure land and air inspired us to work in agriculture and processing of agricultural products.

Company “AVIS” owns two production facilities in Vinnytsia region (Ukraine), which provides a full processing cycle of sunflower seeds and offer wide assortment of products at any stage of the production chain - from crude pressed sunflower oil and cake to fully RDBW sunflower oil and lecithin. Sunflower oil is obtained exceptionally by physical pressing; any extraction methods or chemical substances are not used. LLC-enterprise “AVIS” has 30 years experience in the production of sunflower oil and many years of experience in export operations, including organic products as well, to the European Union, the United States (the company is registered in FDA), Canada, the UAE, the China and the Asian region.

BIOFOODPHARM

LLC

Biofoodpharm is a Ukrainian company producing organic and natural unrefined cold-pressed oils, known for more than 9 years not only in Ukraine, CIS, European countries, but also in the USA, Canada, Australia and other countries.

We are a producer of organic and natural cold-pressed oils for food and cosmetic purposes. Our oils are used in cosmetics, food, shampoos, soaps, added as ingredients in various creams and sold as edible oils in supermarkets, vegan grocery stores and boutiques. Our product list includes 61 types of cold-pressed natural oils. The most popular of them are rosehip, sea buckthorn, pumpkin, walnut, milk thistle, black cumin and other oils.

We produce our oils from ecologically clean raw materials on modern equipment, guaranteeing high quality of our products to each buyer.

KRASNOGIRSKIY OIL FACTORY

LTD

Krasnogirskiy Oil Factory LTD, located in Antypivka village, Zolotonosha district, Cherkasy region, Ukraine, was founded in 2011. The company processes sunflower and rapeseed. It has been certified organic since 2020.

The company currently occupies an area of 3.1 hectares and includes an elevator for receiving, drying, cleaning and storage of oilseeds with a storage capacity of 30,000 tonnes and a processing plant with an annual production capacity of 11,000 tonnes of oil with a storage capacity of 500 tonnes of finished products and 600 tonnes of by-products.

Our sunflower oil has excellent gustatory qualities and is superior to other vegetable oils in nutritional value and digestibility. Unrefined sunflower oil is the healthiest, as it retains all the natural components, i.e. A, D, E vitamins and other biologically active substances, so it can and should be consumed raw. The company meets all the requirements of ISO 9001 standard.

KRYVOOZERSK'II OLIYNII ZAVOD ORGANIC

LLC, PART OF OLIYATORG GROUP OF COMPANIES

Since 1991, Oliyatorg Group of Companies has been producing and exporting crude and refined sunflower oil and sunflower cake. All the products are presented in a conventional and organic range. In 2017 production facilities were modernized and today we are one of the main Ukrainian producers and suppliers of sunflower oil and sunflower cake.

We already supply our products to ADM, COFCO, CARGILL, WILMAR, AAK and many other international companies. Our factory operates in compliance with ISO 22000, GMP+, EU organic, NOP and Bio Suisse standards. Our plant applies a two-stage pressing technology without extra chemicals to be involved in production. Our plant technologists and the in-house laboratory ensure high quality of our products, both organic and conventional.

REZON TRADE

LLC

REZON Group of Companies was established in 2016. The company produces refined and unrefined organic sunflower oil and sunflower cake with export to the EU and USA. The main shareholder is Volodymyr Khoruzhenko, co-founder and managing partner of a number of agri-industrial and processing companies with over 15 years of positive reputation in the Ukrainian market and in cooperation with foreign partners. Since 2016, REZON has been actively investing in the market of organic farming and renewable energy in Ukraine.

The work on organic farming began in 2018. The main partner is ARNIKA Group of Companies, the largest producer of organic agricultural products in Ukraine. REZON works with the Oliyatorg Group, the most successful certified producer of organic oil and oil cake in Ukraine with more than 10 years of successful experience. REZON conducts transparent economic activities. Accounting for the Group is carried out by the audit company Baker Tilly Ukraine. REZON has also established successful cooperation with leading investment and commercial banks in Ukraine.

SAUSES & JAMS

LLC

Liqberry was founded in 2011 as a family business to produce unique berry pastes by own patented HTD-technology. The essence of the Liqberry technology is nano-decomposition and simultaneous hydrolysis of wild berries through friction and pressure pulsation. During the process, the cells of the berries are broken down, thus making rich antioxidants from seed oil, which otherwise could not be digested, available for the human body.

Since the foundation the company has grown significantly. Our product list today includes more than 20 different kinds of berry pastes of the highest quality sold all around the world, helping our customers to live healthier and better lives.

VINNYTSIA FOOD & GUSTATORY FACTORY JSC

Vinnytsia Food & Gustatory Factory, Private JSC, is one of the leading companies in Vinnytsia region in the manufacturing of horseradish, mustard, dry snacks and beverages under BXC, O2 Only Organic, Delicco trademarks.

We constantly improve technological processes, introduce new technologies and upgrade the existing equipment.

In the manufacturing process, we mostly use high-quality natural ingredients. These priorities together with a professional approach, many years of experience, control over all stages of the production process guarantee the high quality of our products. We also have huge experience in private label manufacturing.

At the company, we have implemented and continue to operate the system of quality management under ISO 9001 standard and a system of food safety management under ISO 22000 standard.

The product quality is under control of our own laboratory. In 2014, our company successfully passed the international audit and received a certificate under FSSC:22000 scheme (certification scheme for food safety systems in manufacturing of horseradish and mustard).

HEALTH TECHNOLOGIES PE

LLC

The company produces superfood Honey Amaranth Blend, a unique organic superfood based on organic honey, amaranth seed germ and other useful ingredients. Our product doesn't contain any sugar, GMO, gluten, dyes or preservatives. Since 2016, we have been introducing systemic developments to create a healthy and, at the same time, delicious product of the highest quality. This product is produced only by us using a patented technology.

The sophisticated technology, which consists of 21 cycles and 14 days of production, provides the basis for product quality that we can guarantee.

Today we have created 6 types of Honey Amaranth Blend. Moreover, we have a lot of ideas for new products.

HEALTHY TRADITION

LLC

Healthy Tradition is a healthy food brand founded by a woman with a goal to create healthy products and bring new approach to the food processing industry, focused on quality unprocessed ingredients as a basic element of the philosophy. The company is operating in a plant-based food segment, producing a big range of vegan healthy food (snacks, bars, dried breakfasts and drinks, gluten free bakery products).

The company uses the technology that preserves all the nutrients. It also packs and sells branded high quality organic ingredients for end consumers and supermarket shelves. We keep tight relations with organic farmers and international organic suppliers and we understand all quality issues as a producer, so we help others with export-import trade operations.

Healthy Tradition started exporting its products in 2020 and is expanding now to the new markets.

JIVA LTD

LLC

Juva Ltd is a young company established in 2021. This is a project of like-minded people who consolidated their knowledge in commerce, marketing, and production while seeking to create healthy food.

The company aims to be an innovator on the Ukrainian market and create organic products in those product categories where they do not exist.

The first products were organic snacks - roasted sunflower seeds. The consumers can now eat their favourite seeds without any chemical residues.

We do not plan to stop here and are working on development of new products in other categories.

The family company “OGO” specializes in the production of exclusively natural healthy treats and food products. Our mission is to make the usefulness accessible.

The recipe for making healthy delicacies from apple puree and berries has been passed down in our family from generation to generation. The main feature of this recipe was the low temperature cooking, which allowed to preserve the original taste and all the natural useful qualities of the ingredients.

Our production is situated in the ecologically clean region of the Ukrainian Carpathians, in Ivano-Frankivsk city. For the production of our Carpathian fruit snacks we use fruits and berries which are growing and picked right here.

MOL'FAR EKO

LLC

MOL'FAR is a young Ukrainian brand, founded in 2016. Despite the young age, we definitely know what goals we set for ourselves. We are united by dedication to minimalism and reduction of overconsumption for the sake of long-term preservation of the environment.

MOL'FAR organic tea is for modern and energetic people who care about health benefits of the product and appreciate the rich taste of tea.

The main ingredient of our tea is finest rosebay willowherb, which is known for its medicinal properties and is collected in an ecologically clean region of the Ukrainian Carpathians.

NATURE GREEN UKRAINE

LLC

Nature Green Ukraine LLC was established in 2018. Our facility is located at the foot of the Carpathian Mountains in the west of Ukraine, on the border with Slovakia and Hungary. The company produces cultivated fresh organic shiitake mushrooms of top quality. We strive to satisfy our customers by reaching high standards of professionalism and reliability. At Nature Green we make our own first-class organic substrate to produce high-quality organic mushrooms. Using a bulk sterilization system allows us to produce wood substrate in a very energy efficient and hygienic way while being conscious of our environmental footprint.

The company's biggest importer is located in Hungary with end customers in Germany, Belgium, and the Netherlands. Environmentally friendly, exotic mushrooms straight from the eco-farm!

PARTNERS

SWISS-UKRAINIAN PROGRAM “HIGHER VALUE ADDED TRADE FROM THE ORGANIC AND DAIRY SECTOR IN UKRAINE”

Program title	Higher Value Added Trade from the Organic and the Dairy Sector in Ukraine (Short name: Quality FOOD Trade Program (QFTP))
Donor	Swiss State Secretariat for Economic Affairs (SECO)
Executing agency	Research Institute of Organic Agriculture (FiBL, Switzerland) in partnership with SAFOSO AG (Switzerland)
Beneficiaries	Ministry of Economy of Ukraine, State Service of Ukraine on Food Safety and Consumer Protection
Target groups	Private SMEs (producers, processors, service providers) but also relevant public entities in organic and dairy sectors
Program duration	23.08.2019 – 30.06.2023

The overall goal of the Program is to increase value added trade from the organic and dairy sectors, both domestic and export markets, by pursuing two objectives:

► Objective I: to strengthen product quality and safety in the organic and dairy sectors.

The Program will use a programmatic approach for capacity development to improve the regulatory framework and business environment in the organic and dairy sectors, which in turn, will improve the quality and safety of products in general. Considerable attention will be paid to the integration of risk-based concepts in risk management procedures and inspection.

► Objective II: to increase trade capacity in the domestic and export markets with consumer products from the organic and dairy sectors.

Interventions mostly work on meso- and micro-level, supporting sector stakeholders, primarily through service providers, in order to develop domestic and export markets. Organic Multi-Stakeholder Initiative plays a pivotal role in building capacities and better organizing the sector and thus fostering organic market development and trade. In the dairy sector implementation of the National Raw Milk Control Program is a priority to ensure the quality and safety of milk in general as a prerequisite for entering new markets with higher added value. The Program supports the capacity development of the Public Union “Carpathian Taste”, and the promotion of authentic gourmet products from the Ukrainian Carpathians under the trademark “Taste of Ukrainian Carpathians” to strengthen the competitiveness of small and medium-sized producers by implementing a joint marketing strategy. This activity creates the opportunity for local producers to take advantage of the increasing demand for authentic, tasty products from the Ukrainian Carpathians.

ENTREPRENEURSHIP AND EXPORT PROMOTION OFFICE

STATE INSTITUTION

Entrepreneurship and Export Promotion Office (EEPO) is a state institution whose activities aimed at contributing to the development and support of small and medium enterprises, and supporting and promoting export of goods, works and services of Ukrainian producers.

Since May 2021, EEPO together with the Ministry of Digital Transformation of Ukraine is implementing a national project for the entrepreneurship and exports development [Diia.Business](#).

The structure of the EEPO focuses on: partnership development, business opportunities, investment, innovation development, regional infrastructure development, digital transformation, business education and support of SMEs, analytics and growth and development strategies, business interaction with the state, and international cooperation.

Diia

Business

[Diia.Business](#) — is a large-scale national project for entrepreneurship and export promotion, that was initiated by the Ministry of Digital Transformation of Ukraine in February 2020. Since May 2021 the project is implemented jointly by the Ministry of Digital Transformation of Ukraine and the Entrepreneurship and Export Promotion Office. Entrepreneurship and Export Promotion Office is the state institution, that is in charge for the promotion and support of Ukrainian entrepreneurship both in the domestic and foreign markets.

SOURCING SERVICES

In terms of export, the EEPO provides assistance for Ukrainian entrepreneurs in the following areas:

- **Export consulting** — practical advice on foreign market access and development of export potential.
- **Export education** — opportunities to improve knowledge and skills in order to prepare your business for export.
- **Market Intelligence** — analytical materials to explore potential markets for exports: trade reviews of countries, sectoral analytics, guides and information on tariff and non-tariff restrictions.
- **Business opportunities** — measures to expand export opportunities and search for new foreign partners: trade missions, exhibitions, and business forums.
- **B2G platform** — creation of opportunities for the constructive dialogue between businesses, governments and experts.

Business partners search in Ukraine. EEPO will help you to find a reliable business partner in Ukraine. To order sourcing service, [you need to fill out a questionnaire](#) and specify which products is your company looking for. According to the received request and requirements, EEPO will provide you with the direct contacts of verified Ukrainian companies. If necessary, the EEPO sourcing expert can also help to establish the first communication with the selected Ukrainian company.

Organic Ukraine NGO unites only certified organic operators and has important partners for the organic business; it is established to create and develop the Ukrainian and international organic market.

Organic Ukraine has the strength, knowledge, competence and experience to protect the interests of organic producers, processors, distributors, traders, input producers, and contribute to increase in organic sales. Our main focus is business communication for successful development of each organic market operator and organic sector growth.

The purpose of the business association is to help business owners to overcome the difficulties and obstacles they cannot cope with themselves. In addition to the clear benefits for Organic Ukraine member companies, our Union has a multiplier effect and contributes to the improvement of commercial, governmental and economic institutions of Ukraine.

ORGANIC UKRAINE

LTD

Organic Standard was founded in 2007 to become the first local inspection and certification body for organic production. Up to now, it is the only Ukrainian accredited organic certification body approved by the European Union, Switzerland and Canada. Organic Standard provides its inspection and certification services to more than 500 organic operators within Ukraine. It represents more than 75% of all organic operators in the country.

As most of our clients are focused on the international market, Organic Standard has become an important player in export certification services. Clients of the company annually export about 100 thousand tons of products (we control more than 2500 export consignments every year). At the same time, Organic Standard helps national producers to develop the local market. We provide different training sessions regarding the requirements of organic standards, both online and offline, to show the best practices in organic farming and exchange new knowledge in organic production and export. Our senior certification specialists are members of the expert group involved in the development and implementation of the national organic legislation.

SERGIY GALASHEVSKYY

General Manager

ABOUT THE ORGANIC INITIATIVE:

The Organic Initiative is a platform of key Ukrainian organic stakeholders, established in April 2020, which aims to contribute to organic sector development in Ukraine and promote organic trade on the domestic and international markets.

The Organic Initiative unites different private organic stakeholders which, through cooperation, expand their opportunities, establish a long-term cooperation, and contribute to integration in the organic sector and development of the Ukrainian organic market.

ABOUT THE ORGANIC INITIATIVE GRANT PROGRAM:

The Organic Initiative considers it necessary to continue supporting the organic sector, which, being a part of the agri-food sector of Ukraine, affects food security as well as environment and biodiversity suffering from hostilities. Once a dynamic and profitable organic sector of Ukraine could have stopped operating since Russia invaded Ukraine on 24 February 2022, that's why Organic Initiative has started the Grant Program "Support of the Organic Sector in Ukraine" in May 2022. The main goal of this Grant Program is to support micro-, small and medium enterprises and small-scale farmers.
