Preface

Ukrainian berries are exported to over 40 countries, including the European Union, the United States of America, China, Canada, South Korea, New Zealand, Israel, Kazakhstan, Azerbaijan, Georgia, and other countries.

In 2022, despite the full-scale invasion of Russian Federation, Ukraine remained among the world's leading exporters of fresh, frozen and processed berries. The country exported for a total amount of 222.8 million USD. Exports of frozen berries and other fruits set a new national record, reaching 84 thousand tons.

Ukraine grows both the world's most popular berry crops, such as raspberries, blueberries, wild strawberries, blackberries, currants, red currants, gooseberries, and specific, industry-oriented crops such as sea buckthorn, rose hips, honeysuckle, cranberries, elderberries, and dogwoods. It is possible due to the variety of soils required for the respective crops and the best climatic conditions for growing berries.

In 2022, due to military operations, Ukrainian producers faced various problems, such as the occupation of Ukrainian territories, damage and destruction of infrastructure, damage to energy infrastructure, and disruption of export routes. With the government's help, we could relocate our businesses to safe locations. Container transportation through the ports of neighbouring countries was established, customs procedures were simplified, and border crossing was accelerated for perishable goods to deliver products around the world rapidly.

Since June 2022, Ukraine has introduced the «eRobota» state grant program for creating and developing horticulture, berry growing, viticulture, and greenhouse farms. The program will stimulate stable long-term production of fruits and berries. Additionally, there is a state grant program for processing enterprises called «New Level» that, among other purposes, stimulates the creation or development of processing facilities for berries. Domestic companies should produce more ready-to-consume products with a high added value for the Ukrainian market and export.

Ukraine has great potential to develop berry production and increase berry exports. And the government will make every possible effort to help Ukrainian berry producers build their businesses.

Sincerely yours,
The Minister of Agrarian Policy and Food of Ukraine
Mykola Solskyi

Dear Friends,

It is a particular honour for me to present the fourth issue of the Berries Industry of Ukraine catalogue. This year is the most challenging in the history of independent Ukraine – we are fighting for our lives and freedom against the vile military aggression of the Russian Federation. All Ukrainian berry companies presented in this catalogue are real heroes of Ukraine – by staying in business, they provide jobs and sustain our country's economy. They need your support and business collaboration as never before.

I am happy that in the 2023 catalogue, we have increased the number of companies. It is a clear sign that despite all military, economic, political and other difficulties, our businesses keep ongoing operations and their positions on international markets. We continue to be your reliable and trustworthy partner!

Sincerely yours,
Iryna Kukhtina, President
of the Ukrainian Berries Association

General information about Ukraine 

Official Name: Ukraine (UA) 

The political system: semi-presidential representative democratic republic; president directly elected by absolute majority popular vote in 2 rounds if needed for a 5-year term (eligible for a second term); election last held on 21 April 2019; prime minister nominated by the president, confirmed by the Verkhovna Rada.

Area: 603,628 km²

Population: 36 700 000* (August 2023 est.)

Geographical location: Geographical location: Ukraine is situated in the south-east of Europe. It borders on russia, Belarus, Moldova, Slovakia, Hungary, Poland and Romania.

Official language: Ukrainian

Religions: Orthodox Christianity, Greek-Catholic Christianity, Catholicism, Islam

Major cities: Kyiv (the capital), Odesa, Lviv, Kharkiv, Dnipro

Berries Export Dynamics (2014 – 2022)

Berries Export Volume (2022)

Berries Production Volume (2022)

AN OVERVIEW OF THE UKRAINIAN BERRY MARKET

The primary wild berries gathered and marketed include blueberries, blackberries, cranberries, elderberries, lingonberries, and aronia.

Ukraine’s primary production of cultivated berries includes strawberries (54.31 thousand tons), raspberries (65 thousand tons), black and red currants (24.69 thousand tons), and highbush blueberries (1,82 thousand tons).

Ukraine’s total production of berries by official statistics in 2022 was over 154.59 thousand tons, with exports of 88.13 thousand tons of fresh and frozen berries to 97 countries worldwide.

Berry products brought to market by Ukrainian producers include a wide range of wild and cultivated berries.

Ukraine’s berry export is booming, demonstrating immense growth since 2014 (expansion of 25 in volume over nine years), and it is also one of the most attractive returns on investment in Ukrainian agriculture.

Processed products enter the domestic and export markets, mainly quick-frozen berries and berry mixtures, juice concentrates, single variety pures, mixed-fruit preparations, and a wide range of easy-to-use quick-frozen combinations.

To meet changing market trends, Ukrainian producers are rapidly expanding their preparation of packaged, quick-frozen, wild, and cultivated berries that meet all standards.

Semi-processed berries 

Oril-Eco, Ltd

Founded in 2018

The Oril-Eco company planted the first raspberry plantations in 2017, and strawberries plantations in 2018.

In 2018, we began construction of the freezing complex facility near our berry's plantations. In August 2019, we put it into operation. Its freezing capacity is 5 tons per day.

Today we grow raspberries on the area of 25 hectares, strawberries - 13 hectares. We freeze up to 300 tons of strawberries and raspberries annually.

Our company works using exclusively organic technologies, as evidenced by Organic Standard Certificate No. 20-0552-05-01. In addition, we have certified our production according the HACCP requirements.

Our goal is to build a highly efficient enterprise that meets the most stringent of the European standards.

ATLAS

Atlas Export, LLC

Founded in 2015

Atlas is a producer of high quality frozen berries and wild mushrooms. We export to over 12 countries, including Poland, Germany, France, Belgium and Switzerland. Our brand new factory is located in the village of Mykhailivka, 150 km from the EU border.

Our company is the first BRC certified producer of frozen berries in Ukraine. We have strict internal food safety program and HACCP.

Raw materials are sourced through proprietary network of qualified farmers as well as from pristine Carpathian forests.
