Agrarian Policy and
Food of Ukraine

Strategy and Action Plan

Deputy Minister of Agrarian Policy
and Food of Ukraine
Oksana Osmachko

26.11.2024

Strategy for Agriculture and Rural Development until 2030

Ministry of Agrarian Policy and Food of Ukraine

The purpose of the Strategy

- Preparation for joining the EU
- Ensuring sustainable of agriculture and rural development
- Competitive, sustainable and diversified agri-food sector of Ukraine

Results

- Long-term food security
- Enhanced environmental protection
- Climate changes mitigation
- Strengthening the socio-economic balance of rural areas

Strategic goal

Development of an inclusive policy for the agriculture and rural development: institutional capacity

Ministry of Agrarian Policy and Food of Ukraine

Vision

Policy formulation and implementation in the field of agriculture, sanitary and phytosanitary measures and rural development is in line with the EU principles.

The Ministry of Agrarian Policy and Food of Ukraine will strengthen its capacity in analytics and policy-making, as well as in the field of the European integration.

State institutions in the agricultural sector will be reformed in line with the EU's Common Agricultural Policy, in particular with a focus on implementing management and control systems to ensure financial management, adopting the European structure of investment programs, and ensuring transparent and fair support.

Establishment of a Paying Agency

Functioning of the State Agrarian Register

- Increasing the efficiency of state support programs and the Integrated Administration and Control System (IACS):
- The system of identification of all agricultural plots in EU countries called the Land Parcel Identification System (LPIS);
- A system that allows farmers to graphically indicate the agricultural areas for which they are requesting assistance (application for geospatial assistance);
- A computerized database of animals in EU countries with herd-based aid programs;
- An integrated control system that ensures systematic checks of aid applications based on computerized cross-checks and physical checks on the farm (on-the-spot checks)
- Reforming the system of state regulation of commodity markets

Strategic goal

Ministry of Agrarian Policy and Food of Ukraine

Ensuring public needs for high-quality, nutritious and food safety: achieving food security

Vision

Ukraine ensures an adequate level of food security at the national level and is one of the guarantors of global food security.

Food systems function in accordance with the principles of sustainable development and reduce the negative impact on the environment.

Food safety policy and standards for controlling sanitary and phytosanitary measures (SPS) are fully harmonized with the EU requirements.

Adoption of the EU integrated food safety policy and SPS control standards

Implementation of the "Farm to Fork" Strategy

Ensuring domestic food security

Increasing the level of promotion of Ukrainian food to foreign markets

Engagement in ensuring global food security

Strategic goal

Ensuring the sustainability of the agricultural sector: maintaining a stable and fair income of producers, increasing their competitiveness

Ministry of Agrarian Policy and Food of Ukraine

Vision

Agriculture is being restored and improved after the war.

Reconstruction and creation of new food systems is taking place, the share of goods with higher added value is increasing. All agricultural producers, regardless of size, receive a fair income.

Access to financing is transparent and inclusive, particularly for small producers

- Supporting the recovery and sustainability of the agricultural sector
- Limiting the amount of support per producer of agricultural products
- Ensuring competitive policy
- Strengthening the role of the producers' organization, development of the market infrastructure
- Ensuring a fair income for all producers
- Reducing investment risk / increasing access to financing
- Promotion of trade and diversification of exports
- Attracting foreign direct investment
- Reducing the income gap in agriculture
- Increasing productivity and diversification of agricultural activities manufacturers
- Development of the system of geographical indications
- Water resources management - fisheries and aquaculture

Effective use of land: demining, land reform

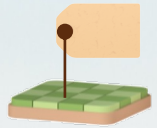
Vision

Contaminated land plots are brought to a condition suitable for use.

The land market operates on the basis of transparency and openness, sustainable and efficient land use is encouraged

Implementation of land reform

Free access to information about the agricultural



Assessment of land

Functioning of the national geoportal

Promoting sustainable development and efficient use of soil, air and water, including by reducing dependence on chemicals

Strategic goal

Ministry of Agrarian Policy and Food of Ukraine

Climate-oriented agriculture: mitigating and adapting to climate change

Vision

Post-war agricultural development is considering climate change.

Agricultural producers use natural resources efficiently.

Fertilizers and plant protection products are applied in accordance with the EU requirements, and the level of their use does not exceed the corresponding level in the EU countries.

Organic production is growing.

Controls over the use of GMOs are being tightened

- Water supply for land irrigation
- Circular bioeconomy
- Preventing biodiversity loss, improving ecosystem services and preserving habitats and landscapes
- Registration and application of fertilizers
- Climate-oriented agriculture
- Bioenergetics
- Simplified seed registration
- Improvement of legislation in the field of plant protection products
- Organic production
- Food waste and losses
- Legislation on GMOs

Strategic goal

Modernization of the agricultural sector: development of processing, innovation, digitalization and knowledge exchange

Ministry of Agrarian Policy and Food of Ukraine

Vision

An effective system of innovation transfer and dissemination of modern technologies for the production and processing of agricultural products has been created.

Successful commercialization of research and development results, optimization of business processes and increased efficiency of resource use due to the digitalization of processes and use of artificial intelligence

Promotion of the development of processing enterprises

Integration of research, education and consultancy

Support for rural business development and agricultural advisory services

Improving access to research, innovation, knowledge sharing and encouraging its use and learning

Digitalization

Creating conditions for the Rural Development

Vision

Rural areas are becoming comfortable places to live and do business thanks to the development of infrastructure, including digital infrastructure.

Women successfully develop business projects on equal and non-discriminatory terms and take an active part in community development.

The share of young people working in rural areas is growing

Approach to rural development

Promoting support for young farmers

Gender equality

Legislation on state support for agriculture

Ministry of Agrarian Policy and Food of Ukraine
